

Patient: [REDACTED]  
 DOB: [REDACTED] Age: [REDACTED] Gender: [REDACTED]  
 Patient Identifiers: [REDACTED]  
 Visit Number (FIN): [REDACTED]

Client: [REDACTED]  
 Physician: [REDACTED]

ARUP Test Code: 0095155  
 Collection Date: 12/07/2016  
 Received in lab: 12/09/2016  
 Completion Date: 12/14/2016

## DNA Content - Cell Cycle Analysis

These results have been reviewed and approved by [REDACTED], MD., MS.

Patient: [REDACTED]  
 ARUP Accession: 16-343-403103

# DNA Cell Cycle Analysis - Ploidy and S-Phase

Patient: [REDACTED] | Date of Birth: [REDACTED] | Gender: [REDACTED] | Physician: [REDACTED]  
Patient Identifiers: [REDACTED], [REDACTED] | Visit Number (FIN): [REDACTED]

## Interpretive Data

**INTERPRETIVE DATA: DNA Analysis - Ploidy and S-Phase**  
The diagnostic and prognostic importance of tumor DNA content depends on the tumor type and source of tissue. Interpretive information, if available for the tumor type, is included with the DNA histogram.  
Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: [aruplab.com/CS](http://aruplab.com/CS)
