

Client: Example Client ABC123  
123 Test Drive  
Salt Lake City, UT 84108  
UNITED STATES

Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 10/9/1952  
**Sex:** Female  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 01/01/2017 12:34

**Hepatitis B Virus Panel, Chronic with Reflex to HBsAg Confirmation**

ARUP test code 0020454

Hepatitis Be Antibody	<b>Positive</b> *	(Ref Interval: Negative)
Hepatitis Be Antigen	Negative	(Ref Interval: Negative)
Hepatitis B Surface Antigen	<b>Positive</b> *	(Ref Interval: Negative)
<p>The HBsAg screening test is strongly reactive. Therefore, confirmatory testing is not necessary but is available upon request. False positives can occur. If the result is not supported by clinical evidence, repeat testing of a new sample usually helps clarify the diagnosis.</p> <p>INTERPRETIVE INFORMATION: Hepatitis B Surface Ag</p> <p>This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cells, Tissues and Cellular and Tissue-Based Products (HCT/P).</p>		
Hepatitis B Surface Antibody	<3.10 IU/L	
Chronic Hepatitis B Panel Interpretation	See Note	
<p>The result pattern of the HBsAg, anti-HBs, HBeAg, and anti-HBe is most consistent with chronic persistent HBV infection. However, a resolving acute HBV infection cannot be excluded. Anti-HBc and HBV DNA testing and comparison to the clinical setting should clarify the diagnosis.</p> <p>An anti-HBs result greater than or equal to 10 IU/L implies immunity. For post-vaccination antibody testing guidelines for the general public refer to MMWR December 3, 2005/Vol. 54(No. 16);1-23, and for healthcare workers refer to MMWR December 20, 2013/Vol. 62(No. 10);1-19.</p> <p>Reference Interval: anti-HBs 9.99 IU/L or less ..... Negative 10.00 IU/L or greater .... Positive Results greater than 1,000.00 IU/L are reported as greater than 1,000.00 IU/L.</p>		

**H=High, L=Low, \*=Abnormal, C=Critical**
