

Patient:
DOB: Age: 27 Gender: F
Patient Identifiers:
Visit Number (FIN):

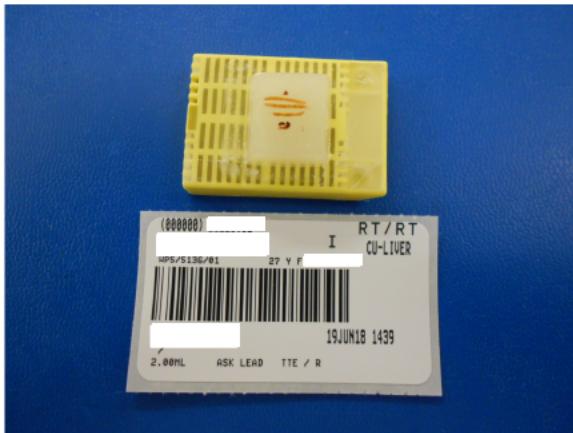

Client:
Physician:

ARUP Test Code: 0020694
Collection Date: 06/19/2018
Received in lab: 06/22/2018
Completion Date: 06/27/2018

Test Results

Components	Test Results	Units	Reference Interval
Tissue Weight	1.50	mg	
Hepatic Copper Concentration by Weight	14.0	ug/g	15.0-55.0

Patient's Liver Tissue Specimen Submitted For Testing

Interpretive Information

- Hepatic copper concentrations approach or exceed 250 microg/g in untreated Wilson disease.
- Elevated hepatic copper is also seen with chronic biliary obstruction and cholestatic conditions.
- Results inconsistent with other findings may reflect heterogeneity in hepatic copper distribution.

For additional information regarding Wilson Disease or other related topics, please refer to the Wilson Disease topic and testing algorithm at www.arupconsult.com.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
