Patient: Patient, Example

DOB: 11/4/1998
Gender: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Beta-hCG, Quantitative (Tumor Marker), CSF

ARUP test code 0020730

Beta-hCG, CSF Quant (Tumor Marker)

54 IU/L H (Ref Interval: 0-3)

INTERPRETIVE INFORMATION: Beta-hCG, CSF Quant (Tumor Marker)

Human chorionic gonadotropin(hCG) is a valuable aid in the management of patients with trophoblastic tumors, nonseminomatous testicular tumors and seminomas when used in conjunction with information available from the clinical evaluation and other diagnostic procedures. Increased HCG concentrations have also been observed in melanoma, carcinomas of the breast, gastrointestinal tract, lung, and ovaries, and in benign conditions, including cirrhosis, duodenal ulcer, and inflammatory bowel disease. This result cannot be interpreted as absolute evidence of the presence or absence of malignant disease. This result is not interpretable as a tumor marker in pregnant females.

The combination of the specific monoclonal antibodies used in the Roche Beta HCG electrochemiluminescent immunoassay recognize the holo-hormone, "nicked" forms of hCG, the beta-core fragment, and the free beta-subunit. Results obtained with different test methods or kits cannot be used interchangeably. Although this assay is FDA cleared for use in the detection of pregnancy, it is not labeled for use as a tumor marker or with CSF specimens. The performance characteristics of this assay were determined by ARUP.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
