VARIANT LYMPH
 These cells can be normal physiologic variants or abnormal forms. They are large and quite variable in appearance. Several distinct types have been described. The terms "atypical, reactive, Downey cell, virocyte" etc., have been used to identify these cells. A normal differential count usually includes up to 6% of variant forms. In children with apparently good health, more immature- appearing lymphocytes with clear nucleoli are sometimes found.

Nucleated RBC Manual 1 % **H** (Ref Interval: 0-0)
