Parasites Smear (Giemsa Stain), Blood
ARUP test code 0049025

Parasites Smear (Giemsa Stain), Blood  Negative  (Ref Interval: Negative)

Because of the intermittent nature of parasitemia, examination
of smears from multiple specimens may be necessary. If the
diagnosis of malaria is to be rigorously pursued, examination of
3 specimens taken at 6–8 hour intervals on 3 successive days
regardless of clinical symptoms is recommended.
