Collection Date:	00/00/0000 00:00

Glomerular Basement Membrane Antibody, IgG (IFA)
ARUP test code 0049191

GBM Antibody, IgG by IFA   Negative   (Ref Interval: Negative)

INTERPRETIVE INFORMATION: GBM Ab, IgG (IFA)

When present, IgG antibody to glomerular basement membrane (GBM)
antigen detected by either indirect fluorescent antibody (IFA)
or multiplex bead assay helps support a diagnosis of Goodpasture
syndrome. However, the combined result of both assays performed
during initial evaluation improves the diagnostic sensitivity
for disease. A positive result in one or both assays should be
confirmed by renal biopsy.

This test was developed and its performance characteristics
determined by ARUP Laboratories. It has not been cleared or
approved by the US Food and Drug Administration. This test was
performed in a CLIA certified laboratory and is intended for
clinical purposes.
