Glomerular Basement Membrane Antibody, IgG (IFA)

ARUP test code 0049191

GBM Antibody, IgG by IFA

Positive * (Ref Interval: Negative)

INTERPRETIVE INFORMATION: GBM Ab, IgG (IFA)

When present, IgG antibody to glomerular basement membrane (GBM) antigen detected by either indirect fluorescent antibody (IFA) or multiplex bead assay helps support a diagnosis of Goodpasture syndrome. However, the combined result of both assays performed during initial evaluation improves the diagnostic sensitivity for disease. A positive result in one or both assays should be confirmed by renal biopsy.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
