**Glomerular Basement Membrane Antibody, IgG (IFA)**

ARUP test code 0049191

**GBM Antibody, IgG by IFA**

**Positive**  *

**INTERPRETIVE INFORMATION:** GBM Ab, IgG (IFA)

When present, IgG antibody to glomerular basement membrane (GBM) antigen detected by either indirect fluorescent antibody (IFA) or multiplex bead assay helps support a diagnosis of Goodpasture syndrome. However, the combined result of both assays performed during initial evaluation improves the diagnostic sensitivity for disease. A positive result in one or both assays should be confirmed by renal biopsy.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement D: aruplab.com/CS
