

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 12/31/1899
Gender: Unknown
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Estrogen/Progesterone Receptor with Interpretation by Immunohistochemistry

ARUP test code 0049210

Estrogen Receptor IP Positive

% of Nuclei Staining (ER) 100 %

Estrogen Receptor Intensity Strong

Progesterone Receptor IP Positive

% of Nuclei Staining (PR) 80 %

Progesterone Receptor Intensity Strong

EstrogRecep IHC Internal Control Staining Present

Estrog/Progest Receptor Interpretation See Note

Controls were run and performed as expected. This result has been reviewed and approved by Jola Jedrzkiewicz, M.D.

H=High, L=Low, *=Abnormal, C=Critical

Unless otherwise indicated, testing performed at:

INTERPRETIVE INFORMATION: Estrogen/Progesterone Recp w/Interp IHC
Tumor cell nuclei demonstrating immunoreactivity of greater than or equal to 1 percent are considered positive and correlate with a favorable response to hormone therapy and an improved prognosis. Tumor cell nuclei demonstrating immunoreactivity of less than 1 percent are considered negative.

A measurement of weak, moderate, or strong is reported based on an estimate of the average staining intensity of positively-stained tumor cells in the entire tissue section relative to positive and internal (benign glands) controls.

Staining is performed on paraffin-embedded formalin-fixed tissue. Antibody clone for ER is SP1, clone for PR is 16 and the detection system is a proprietary polymeric HRP. These clones are not currently FDA-approved.

Evaluation of positive and negative controls for appropriate reactivity is also performed.

For more information refer to ASCO/CAP guidelines found at <http://www.jco.org>.
See Compliance Statement B: www.aruplab.com/CS

ProgstRecp IHC Internal Control Staining **Present**
