

Patient: [REDACTED]
DOB: [REDACTED] Age: 74 Sex: M
Patient Identifiers: [REDACTED]
Visit Number (FIN): [REDACTED]

Client: [REDACTED]
Physician: [REDACTED]

ARUP Test Code: 0050049
Collection Date: 02/09/2024
Received in lab: 02/10/2024
Completion Date: 02/12/2024

Immunofixation IgD

See Note

IFE gel is negative for monoclonal IgD and IgE. IFE gel shows a band in kappa suggestive of a free kappa light chain monoclonal protein. This assumes an IFE for IgG, IgA and IgM heavy chains has been performed and shows no association with the monoclonal kappa protein.

Immunofixation IgE

See Note

Refer to IFE IgD for interpretative comments.

Note: Immunofixation (IFE) Gel image, as applicable, continue on following page.

Immunofixation Electrophoresis, Immunoglobulin D and Immunoglobulin E, Serum
