Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Entamoeba histolytica (amebiasis), Antibody, IgG

ARUP test code 0050070

E. histolytica (amebiasis), Ab, IgG 4 U (Ref Interval: <=8)

INTERPRETIVE INFORMATION: E. Histolytica (Amebiasis) Ab

8 U or less Negative - No significant level of detectable E. histolytica IgG antibody.
9 - 11 U Equivocal - Repeat testing in 10-14 days may be helpful.
12 U or greater Positive - IgG antibody to E. histolytica detected, suggestive of a current or past infection.

Seroconversion between acute and convalescent sera is considered strong evidence of recent infection. The best evidence for infection is a significant change on two appropriately timed specimens where both tests are done in the same laboratory at the same time.
