Physician: Doctor, Example

Patient: Patient, Example

DOB: 4/22/1947
Gender: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Bartonella quintana Antibodies, IgG & IgM by IFA

ARUP test code 0050106

Bartonella quintana Antibody, IgG

<1:64

INTERPRETIVE INFORMATION: Bartonella quintana Antibody, IgG

Less than 1:64 Negative: No significant level of Bartonella quintana IgG antibody detected.
1:64 - 1:128 Equivocal: Questionable presence of Bartonella quintana IgG antibody detected. Repeat testing in 10-14 days may be helpful.
1:256 or greater Positive: Presence of IgG antibody to Bartonella quintana detected, suggestive of current or past infection.

A low positive suggests past exposure or infection, while high positive results may indicate recent or current infection, but is inconclusive for diagnosis. Seroconversion between acute and convalescent sera is considered strong evidence of recent infection. The best evidence for infection is a significant change on two appropriately timed specimens where both tests are done in the same laboratory at the same time.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Bartonella quintana Antibody, IgM

1:256 *

H=High, L=Low, *=Abnormal, C=Critical

INTERPRETIVE INFORMATION: Bartonella quintana Ab, IgM

Less than 1:16 Negative-No significant level of Bartonella quintana IgM antibody detected.
1:16 or greater Positive-Presence of IgM antibody to Bartonella quintana detected, suggestive of current or recent infection.

The presence of IgM antibodies suggests recent infection. Low levels of IgM antibodies may occasionally persist for more than 12 months post-infection.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
