

Client: Example Client ABC123 123 Test Drive Salt Lake City, UT 84108 UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB	4/9/2001
Gender:	Male
Patient Identifiers:	01234567890ABCD, 012345
Visit Number (FIN):	01234567890ABCD
Collection Date:	00/00/0000 00:00

Bartonella henselae (Cat Scratch) Antibodies, IgG & IgM by IFA

ARUP test code 0050108

Bartonella henselae Antibody IgG	<1:64 INTERPRETIVE INFORMATION: Bartonella henselae Ab, IgG		
	Less than 1:64 Negative: No significant level of Bartonella henselae IgG antibody detected. 1:64 - 1:128 Equivocal: Questionable presence		
	of Bartonella henselae IgG antibody detected. Repeat testing in 10-14 days may be helpful. 1:256 or greater Positive: Presence of IgG antibody to Bartonella henselae detected, suggestive of current or past infection.		
	A low positive suggests past exposure or infection, while high positive results may indicate recent or current infection, but are inconclusive for diagnosis. Seroconversion between acute and convalescent sera is considered strong evidence of recent infection. The best evidence for infection is significant change on two appropriately timed specimens where both tests are done in the same laboratory at the same time.		
	This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.		
Bartonella henselae Antibody IgM	< 1:16		

H=High, L=Low, *=Abnormal, C=Critical

Unless otherwise indicated, testing performed at:

INTERPRETIVE INFORMATION: Bartonella henselae Antibody, IgM

- Less than 1:16 Negative: No significant level of Bartonella henselae IgM antibody detected.
- 1:16 or greater Positive: Presence of IgM antibody to Bartonella henselae detected, suggestive of current or recent infection.

The presence of IgM antibodies suggest recent infection, low levels of IgM antibodies may occasionally persist for more than 12 months post infection.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
