Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

DNase-B Antibody

ARUP test code 0050220

DNase B Antibody

<86 U/mL (Ref Interval: <=259)

REFERENCE INTERVAL: DNase B Antibody

Elevated titers of antideoxyribonuclease B antibody (anti-DNase B) or antistreptolysin O antibody (ASO) indicate a recent group A Streptococcus infection. Anti-DNase B antibodies typically remain elevated longer than ASO and may remain elevated for several months after infection. Patients suspected of having complications related to a recent Streptococcus infection such as acute glomerulonephritis or acute rheumatic fever may have elevated anti-DNase B but normal ASO antibody titers. A negative or very low anti-DNase B and ASO antibody titers, especially from a specimen tested 2 weeks after a suspected infection, indicates unlikely incidence of a recent Streptococcus infection.

VERIFIED/REPORTED DATES

Procedure	Accession	Collected	Received	Verified/Reported
DNase B Antibody	23-231-112319	00/00/0000 00:00	00/00/0000 00:00	00/00/0000 00:00
