**Legionella pneumophila Antibody (Types 1-6), IgM by IFA**

ARUP test code 0050274

Legionella Pneumophila 1-6,IgM

**1:32 \* (Ref Interval: < 1:16)**

INTERPRETIVE INFORMATION: Legionella pneumophila Antibody (Types 1-6), IgM by IFA

The IgM antibody to Legionella pneumophila serotypes 1-6 is measured using an IgM-specific conjugate. It is recommended that the IgM test always be performed in conjunction with the IgG antibody test.

The IgM response to Legionella tends to develop concurrently with the IgG response and may remain elevated as long as the IgG response remains elevated. Cross-reactions have been described with several species of bacteria and Mycoplasma.
