123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 4/13/1961
Gender: Female
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Treponema pallidum Antibody, IgG by ELISA

ARUP test code 0050920

Treponema pallidum Ab, IgG by ELISA

0.2 IV (Ref Interval: <=0.9)
INTERPRETIVE INFORMATION: T.pallidum Ab, IgG by ELISA

- 0.9 IV or less Negative: No significant level of Treponema pallidum IgG antibody detected.
- 1.0 IV..... Equivocal: Questionable presence of Treponema pallidum IgG antibody detected. Repeat testing in 10-14 days may be helpful.
- 1.1 IV or greater Positive: Presence of IgG antibody to Treponema pallidum detected, suggestive of current or past infection.

Seroconversion between acute and convalescent sera is considered strong evidence of recent infection. The best evidence for infection is a significant change on two appropriately timed specimens, where both tests are done in the same laboratory at the same time. The Treponema pallidum Antibody (FTA-ABS)serum, IgG by IFA (0050477) is recommended for follow-up of reactive nontreponemal tests for syphilis, and as a single test in patients suspected of late syphilis. For CSF specimens, the Treponema pallidum (VDRL), cerebrospinal Fluid with Reflex to Titer (0050206) test is recommended.

VERIFIED/REPORTED DATES

Procedure	Accession	Collected	Received	Verified/Reported
Treponema pallidum Ab, IgG by ELISA	19-288-400759	10/11/2019 6:18:00 PM	10/15/2019 9:57:32 AM	10/16/2019 5:38:00 PM
