Visit Number (FIN): 01234567890ABCD  
Collection Date: 00/00/0000 00:00

Ehrlichia chaffeensis Antibody, IgG by IFA  
ARUP test code 0051004

Ehrlichia chaffeensis Antibody, IgG

>1:1024 H (Ref Interval: <1:64)

INTERPRETIVE INFORMATION: Ehrlichia Chaffeensis IgG Ab

Less than 1:64 ..... Negative: No significant level of Ehrlichia chaffeensis IgG antibody detected.  
1:64-1:128 ..... Equivocal: Questionable presence of Ehrlichia chaffeensis IgG antibody detected. Repeat testing in 10-14 days may be helpful.  
1:256 or greater ..... Positive: Presence of IgG antibody to Ehrlichia chaffeensis detected, suggestive of current or past infection.

Seroconversion between acute and convalescent sera is considered strong evidence of recent infection. The best evidence for infection is a significant change (fourfold difference in titer) on two appropriately timed specimens, where both tests are done in the same laboratory at the same time.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
