

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example
DOB12/24/1978
Gender:Female
Patient Identifiers:01234567890ABCD, 012345
Visit Number (FIN):01234567890ABCD
Collection Date:00/00/0000 00:00

Deamidated Gliadin Peptide (DGP) Antibodies, IgA and IgG
ARUP test code 0051358

Deamidated Gliadin Peptide (DGP) Ab, IgA	<0.72 FLU (Ref Interval: 0.00-4.99) INTERPRETIVE INFORMATION: Deamidated Gliadin Peptide (DGP) Ab, IgA A positive deamidated gliadin (DGP) IgA antibody result is associated with celiac disease but is not to be used as an initial screening test due to its low specificity and only occasional positivity in celiac disease patients who are negative for tissue transglutaminase (tTG) IgA antibody.
Deamidated Gliadin Peptide (DGP) Ab, IgG	<0.56 FLU (Ref Interval: 0.00-4.99) INTERPRETIVE INFORMATION: Deamidated Gliadin Peptide (DGP) Ab, IgG In individuals with low or deficient IgA, testing for tissue transglutaminase (tTG) and deamidated Gliadin (DGP) antibodies of the IgG isotype is performed. Positive tTG and/or DGP IgG antibody results indicate celiac disease; however, small intestinal biopsy is required to establish a diagnosis due to the lower accuracy of these markers, especially in patients without IgA deficiency.
