Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Neutrophil-Associated Antibodies

ARUP test code 0055506

Neutrophil Associated Antibodies

Negative (Ref Interval: Negative)

INTERPRETIVE INFORMATION: Neutrophil Associated Antibodies

Neutrophil-associated antibodies may cause neutropenia in various autoimmune disorders including Felty syndrome, SLE and drug-induced neutropenia. Febrile transfusion reactions and isoimmune neonatal neutropenia may also be caused by antibodies to neutrophil-specific antigens or HLA antigens.

A positive result is not definitive for specific anti-neutrophil antibodies. Anti-HLA antibodies and immune complexes may also cause a positive result. The results of this test should be correlated to clinical history and other data.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
