**173.07 FLU H (Ref Interval: 0.00-4.99)**

INTERPRETIVE INFORMATION: Tissue Transglutaminase Ab, IgG

In individuals with low or deficient IgA, testing for tissue transglutaminase (tTG) and deamidated Gliadin (DGP) antibodies of the IgG isotype is performed. Positive tTG and/or DGP IgG antibody results indicate celiac disease; however, small intestinal biopsy is required to establish a diagnosis due to the lower accuracy of these markers, especially in patients without IgA deficiency.
