Aspergillus Galactomannan Antigen by EIA, Serum

ARUP test code 0060068

Aspergillus Galactomannan Antigen, Serum	Negative	(Ref Interval: Negative)
	<p>INTERPRETIVE INFORMATION: Aspergillus Galactomannan Antigen by EIA Negative results do not exclude the diagnosis of invasive aspergillosis. A single positive test result (index equal to or greater than 0.5) should be clinically correlated by testing a separate serum specimen because many agents (e.g. foods, antibiotics) may cross-react with the test. If invasive aspergillosis is suspected in high-risk patients, serial sampling is recommended.</p>	

Aspergillus Galactomannan Index 0.08
