Final Report

Culture negative for Coccidioides immitis/posadasii.
Filamentous Basidiomycete
most closely resembles
Trametes species
Basidiomyceteous moulds are environmental fungi
that have rarely been implicated in human disease.
Clinical and pathologic correlation is required to
determine the significance of this isolate.
Unable to definitively identify using MALDI-TOF.
Identification by DNA sequencing.
This test was developed and its performance characteristics
determined by ARUP Laboratories. It has not been cleared or
approved by the U.S. Food and Drug Administration.
This test was performed in a CLIA-certified laboratory and
is intended for clinical purposes.
