

Client: Example Client ABC123  
123 Test Drive  
Salt Lake City, UT 84108  
UNITED STATES

Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 7/1/1960  
**Gender:** Female  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 01/01/2017 12:34

**Calcitonin**

ARUP test code 0070006

Calcitonin

<2.0 pg/mL (Ref Interval: 0.0-5.1)

INTERPRETIVE INFORMATION: Calcitonin  
Calcitonin levels greater than 100 pg/mL may occur in the  
following conditions: medullary thyroid carcinomas (MTC),  
Leukemias, and myeloproliferative disorders.

Provocative testing (calcium) is suggested in patients with MTC  
if the calcitonin is not clearly diagnostic.

The Siemens Immulite 2000 method is used. Results obtained with  
different assay methods or kits cannot be used interchangeably.  
Calcitonin is useful in monitoring medullary thyroid carcinoma.  
The calcitonin assay value, regardless of level, should not be  
interpreted as absolute evidence of the presence or absence of  
malignant disease.
