## Barium Quantitative, Serum or Plasma

ARUP test code 0091282

| Barium Quantitative, Serum or Plasma | None Det mcg/L <br> Serum or Plasma <br> Reporting Limit: $5.0 \mathrm{mcg} / \mathrm{L}$ <br> Reported Normal: Less than $10 \mathrm{mcg} / \mathrm{L}$. <br> NMS Labs has demonstrated that certain collection tubes <br> can artifactually increase measured barium <br> concentrations rendering reported concentrations <br> difficult to interpret. <br> Analysis by Inductively Coupled Plasma/Mass <br> Spectrometry (ICP/MS) <br> Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen in a trace metal free container. <br> This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration. <br> Testing performed at NMS Labs, Inc. <br> 200 Welsh Road <br> Horsham, PA 19044-2208 <br> CLIA 39D0197898 |
