ARUP test code 0092311

Drug Confirmation, Barbiturates, Mec

Positive

Confirmed POSITIVE by LC-MS/MS for the following barbiturate(s):

Phenobarbital = 3000 ng/g
Butalbital = 1000 ng/g

INTERPRETIVE INFORMATION: Drug Confirmation, Barbiturates,
Mec

Methodology: GC/MS, LC-MS/MS, and/or LC-TOF/MS

Drugs covered: butalbital and phenobarbital.

Positive cutoff: 50 ng/g

Meconium begins to form between the 12th and 16th week of gestation. Meconium drug testing can detect maternal drug use during the last 4 to 5 months of pregnancy. A negative result does not exclude the possibility that a mother used drugs during pregnancy. Detection of drug use depends on the quantity and quality of the specimen tested as well as the pattern and frequency of drug(s) used by mother. The concentration value must be greater than or equal to the cutoff to be reported as positive. Interpretive questions should be directed to the laboratory.

For medical purposes only; not valid for forensic use.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
