ARUP test code 0092313

Drug Confirmation, Methadone/Metab, Mec

Negative

INTERPRETIVE INFORMATION: Drug Confirmation,  
Methadone/Metab, Mec

1. Drugs covered: methadone and metabolite (EDDP).
2. Positive cutoff: 10 ng/g.
3. For medical purposes only; not valid for forensic use.
4. Meconium begins to form between the 12th and 16th week of gestation. Meconium drug testing can detect maternal drug use during the last 4 to 5 months of pregnancy. A negative result does not exclude the possibility that a mother used drugs during pregnancy. Detection of drug use depends on the quantity and quality of the specimen tested as well as the pattern and frequency of drug(s) used by mother. The concentration value must be greater than or equal to the cutoff to be reported as positive. Interpretive questions should be directed to the laboratory.
