

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 1/31/1995
Sex: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Histoplasma Antigen Quantitative by EIA, Serum

ARUP test code 0092522

Histoplasma Antigen, Serum Interp

Detected * (Ref Interval: Not Detected)

INTERPRETIVE INFORMATION: Histoplasma Antigen Quantitative by EIA, Serum

Less than 0.19 ng/mL = Not Detected
0.19-60.0 ng/mL = Detected
Greater than 60.0 ng/mL = Detected (above the limit of quantification).

The quantitative range of this assay is 0.19-60.0 ng/mL. Antigen concentrations greater than 60.0 ng/mL fall outside the linear range of the assay and cannot be accurately quantified.

This EIA test should be used in conjunction with other diagnostic procedures, including microbiological culture, histological examination of biopsy samples, and/or radiographic evidence, to aid in the diagnosis of histoplasmosis.

Crossreactivity with Blastomyces dermatitidis, Coccidioides immitis and possibly Talaromyces marneffeii have been observed with this EIA. Other clinically and geographically relevant endemic mycoses should be considered in the case of a positive test result.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Histoplasma Antigen, Serum

0.47 ng/mL
