

Patient: [REDACTED]
 DOB: [REDACTED] Age: 9 Gender: [REDACTED]
 Patient Identifiers: [REDACTED]
 Visit Number (FIN): [REDACTED]

Client: [REDACTED]
 Physician: [REDACTED]

ARUP Test Code: 0095155
 Collection Date: 04/24/2020
 Received in lab: 04/25/2020
 Completion Date: 04/26/2020

DNA Content - Cell Cycle Analysis

These results have been reviewed and approved by [REDACTED]

Patient: [REDACTED]
 ARUP Accession: 20-116-400224

DNA Cell Cycle Analysis - Ploidy and S-Phase

Patient: [REDACTED] | Date of Birth: [REDACTED] | Gender: U | Physician: [REDACTED]
Patient Identifiers: [REDACTED] | Visit Number (FIN): [REDACTED]

Interpretive Data

INTERPRETIVE DATA: DNA Analysis - Ploidy and S-Phase
The diagnostic and prognostic importance of tumor DNA content depends on the tumor type and source of tissue. Interpretive information, if available for the tumor type, is included with the DNA histogram.
Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
