

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 7/24/1975
Gender: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Platelet Associated Antibodies, Direct Assay

ARUP test code 0095614

Platelet Antibodies Direct, IgG	Negative	(Ref Interval: Negative)
---------------------------------	----------	--------------------------

Platelet Antibodies Direct, IgM	Negative	(Ref Interval: Negative)
---------------------------------	----------	--------------------------

INTERPRETIVE INFORMATION: Platelet Assoc Antibodies, Direct Assay

Negative (IgG and IgM): No excess antibodies were associated with the patient's platelets. An immune cause of thrombocytopenia is unlikely.

Positive (IgG and/or IgM): An increase in platelet associated immunoglobulin is noted. An immune cause of thrombocytopenia should be considered. However, many conditions can result in an increase in platelet associated antibodies; for example, IgM rheumatoid factor antibodies.

Strong Positive (IgG and/or IgM): A definite increase in platelet associated immunoglobulin is noted and an immune cause of thrombocytopenia should be considered. However, many conditions can result in an increase in platelet associated antibodies; for example, IgM rheumatoid factor antibodies.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

H=High, L=Low, *=Abnormal, C=Critical
