

Client: Example Client ABC123 123 Test Drive Salt Lake City, UT 84108 UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB 8/27/1975

Gender: Male

Patient Identifiers: 01234567890ABCD, 012345

Visit Number (FIN): 01234567890ABCD **Collection Date:** 00/00/0000 00:00

Platelet Associated Antibodies, Direct Assay

ARUP test code 0095614

Platelet Antibodies Direct, IgG

Positive

*

(Ref Interval: Negative)

Platelet Antibodies Direct, IgM

Strong Pos

*

(Ref Interval: Negative)

 ${\tt INTERPRETIVE\ INFORMATION:\ Platelet\ Assoc\ Antibodies,\ Direct\ Assay}$

Negative (IgG and IgM): No excess antibodies were associated with the patient's platelets. An immune cause of thrombocytopenia is unlikely.

Positive (IgG and/or IgM): An increase in platelet associated immunoglobulin is noted. An immune cause of thrombocytopenia should be considered. However, many conditions can result in an increase in platelet associated antibodies; for example, IgM rheumatoid factor antibodies.

Strong Positive (IgG and/or IgM): A definite increase in platelet associated immunoglobulin is noted and an immune cause of thrombocytopenia should be considered. However, many conditions can result in an increase in platelet associated antibodies; for example, IgM rheumatoid factor antibodies.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
