HLA-B27

ARUP test code 0095840

HLA-B27

See Note

(Ref Interval: Negative)

The HLAB27 phenotyping result by flow cytometry is indeterminate. If clinically indicated, DNA testing should be considered for a definitive result (Ankylosing Spondylitis HLA-B27 Genotyping, ARUP test code 0050392). By request, this test can be added to the originally submitted whole blood specimen if the specimen meets the testing requirements as published in the ARUP Laboratory Test Directory.

INTERPRETIVE INFORMATION: HLA-B27

HLA-B27 is a serologically defined allele of the human HLA-B locus. The presence of the HLA-B27 antigen is strongly associated with ankylosing spondylitis and related disorders.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
