Lymphocyte Subset Panel 2 Information

See Note

INTERPRETIVE INFORMATION: CD4 Percent and Absolute Count

The CD4 cells are Helper T-cells expressing both CD3 and CD4. CD4 percentage is reported as a percent of total lymphocytes. CD4 T-cells levels are a criterion for categorizing HIV-related clinical conditions by CDC's classification system for HIV infection. The measurement of CD4 T-cell levels has been used to establish decision points for initiating P. jirovecii prophylaxis, antiviral therapy and to monitor the efficacy of treatment. The Public Health Service (PHS) has recommended that CD4 T-cell levels be monitored every three to six months in all HIV-infected persons.
