Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Nickel, Serum
ARUP test code 0099452

Nickel, Serum 15.0 ug/L H (Ref Interval: <=10.0)

Due to the nationwide shortage of trace element-free blood specimen collection tubes that are used for trace metals testing, ARUP Laboratories will accept noncertified trace-free blood collection tubes for red top (serum) and lavender (EDTA) tubes. Elevated concentrations should be interpreted with caution when specimens are collected in noncertified, trace-free blood collection tubes.

INTERPRETIVE INFORMATION: Nickel, Serum

Elevated results may be due to skin or collection-related contamination, including the use of a noncertified metal-free collection/transport tube. If contamination concerns exist due to elevated levels of serum nickel, confirmation with a second specimen collected in a certified metal-free tube is recommended.

Serum nickel testing is intended to detect potentially toxic exposure.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
