**Porphyrians, Fecal**

ARUP test code 0099824

Coproporphyrin, Feces 11 nmol/g (Ref Interval: 0-45)

Protoporphyrin, Feces 28 nmol/g (Ref Interval: 0-100)

This test is useful for differentiation of acute porphyrias following a positive porphobilinogen (PBG), or diagnosis or strong suspicion of acute porphyria. Fecal porphyrin excretion usually is not elevated in acute intermittent porphyria (AIP), but massive increases of fecal coproporphyrin are seen in hereditary coproporphyrin (HCP). Fecal protoporphyrin and coproporphyrin excretion is increased in variegate porphyria (VP).  
This fecal porphyrians assay is not a screening test. Total porphyrians are not measured.  
For additional information, access the Porphyrias topic in ARUP Consult (arupconsult.com).

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
