

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 7/21/1957
Gender: Female
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Porphyrians, Fecal

ARUP test code 0099824

Coproporphyrin, Feces **46 nmol/g H** (Ref Interval: 0-45)

Protoporphyrin, Feces **245 nmol/g H** (Ref Interval: 0-100)

This test is useful for differentiation of acute porphyrias following a positive porphobilinogen (PBG), or diagnosis or strong suspicion of acute porphyria. Fecal porphyrin excretion usually is not elevated in acute intermittent porphyria (AIP), but massive increases of fecal coproporphyrin are seen in hereditary coproporphyrin (HCP). Fecal protoporphyrin and coproporphyrin excretion is increased in variegate porphyria (VP).

This fecal porphyrians assay is not a screening test. Total porphyrians are not measured. For additional information, access the Porphyrias topic in ARUP Consult (arupconsult.com).

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Porphyrin Fecal Interpretation

See Note
Increased excretion of fecal protoporphyrin
