Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 3/15/2024  
**Gender:** Female  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Osmotic Fragility, Erythrocyte**

ARUP test code 2002257

Osmotic Fragility

Normal

Patient red blood cells show normal osmotic fragility.

If the clinical suspicion for hereditary spherocytosis is high, further analysis of RBC band 3 protein reduction by flow cytometry (ARUP test code 2008460) is recommended.

INTERPRETIVE INFORMATION: Osmotic Fragility

For patients with acute hemolysis, a normal red cell osmotic fragility test result cannot exclude an osmotic fragility abnormality since the osmotically labile cells may be hemolyzed and not present. Recommend testing during a state of prolonged homeostasis with stable hematocrit.
