

Client: Example Client ABC123 123 Test Drive Salt Lake City, UT 84108 UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

| DOB | 7/2/2014 |
|-----------------------------|-------------------------|
| Gender: | Female |
| Patient Identifiers: | 01234567890ABCD, 012345 |
| Visit Number (FIN): | 01234567890ABCD |
| Collection Date: | 00/00/0000 00:00 |

Allergen, Interpretation (Not Client Orderable)

ARUP test code 0055041

| Allergen, Interp, Immunocap Score IgE | See Note REFERENCE INTERVAL: Allergen, Interpretation |
|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Less than 0.10 kU/LClass 0No significant level detected 0.10-0.34 kU/LClass 0/1Clinical relevance undetermined 0.35-0.70 kU/LClass 1Low 0.71-3.50 kU/LClass 2Moderate 3.51-17.50 kU/LClass 3High 17.51-50.00 kU/LClass 4Very High 50.01-100.00 kU/LClass 5Very High Greater than 100.00kU/LClass 6Very High |
| | Allergen results of 0.10-0.34 kU/L are intended for specialist use as the clinical relevance is undetermined. Even though increasing ranges are reflective of increasing concentrations of allergen-specific IgE, these concentrations may not correlate with the degree of clinical response or skin testing results when challenged with a specific allergen. The correlation of allergy laboratory results with clinical history and in vivo reactivity to specific allergens is essential. A negative test may not rule out clinical allergy or even anaphylaxis. |

Allergen, Food, Flaxseed/Linseed IgE

| ARUP test code 2003298 | |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Allergen, Food, Flaxseed/Linseed IgE | >100.00 kU/L H (Ref Interval: <=0.34) |
| | This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes. |

H=High, L=Low, *=Abnormal, C=Critical
