UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB 1/22/1995 Female Gender:

Patient Identifiers: 01234567890ABCD, 012345

Visit Number (FIN): 01234567890ABCD **Collection Date:** 00/00/0000 00:00

Macroamylase Determination

ARUP test code 2004464

Amylase, Total

44 U/L

(Ref Interval: 28-100)

Amylase, Monomeric

31 U/L

(Ref Interval: 23-110)

INTERPRETIVE INFORMATION: Macroamylase Determination

An amylase, monomeric result above the upper reference limit is consistent with hyperamylasemia. An amylase, percent monomeric less than 71 percent suggests the presence of macroamylase.

Amylase, monomeric is determined after ultrafiltration. Macroamylase is removed by ultrafiltration and is not measured.

For confirmation of macroamylasemia, consider ordering Amylase, Urine (0020471).

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
