Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 4/22/1982  
**Gender:** Male  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Antibiotic Level, Ceftazidime**

ARUP test code 2004886

Antibiotic Level, Ceftazadime

26 ug/mL

INTERPRETIVE INFORMATION: Antibiotic Level, Ceftazadime  
Normal peak serum concentration for ceftazidime is 42 ug/mL with a 500 mg IV dose, 69 ug/mL with a 1 g IV dose or 159-186 ug/mL with a 2 g IV dose. Trough serum concentration is not well established.

For bioassay measurements, the presence of other antimicrobial agents may interfere with the assay. Other factors that may influence antimicrobial levels include inherent differences among patients and their underlying physical conditions as well as the dose and route of administration of the antimicrobial agent.
