Serotonin Release Assay (Heparin Dependent Platelet Antibody), Unfractionated Heparin

ARUP test code 2005631

SRA, Unfractionated Heparin, Low Dose	0 %	
SRA, Unfractionated Heparin, High Dose	0 %	
SRA, Unfractionated Heparin	Negative	(Ref Interval: Negative)
SRA, Unfractionated Heparin, Interp.	See Note	

This patient's specimen demonstrates a negative result in the serotonin release assay. A diagnosis of heparin-induced thrombocytopenia (HIT) is unlikely, but not completely excluded.

A positive result would demonstrate $\geq 20\%$ serotonin release from reagent platelets in the presence of patient specimen and low-dose heparin (0.1 U/mL) and $<20\%$ serotonin release from reagent platelets (inhibition of the reaction) in the presence of patient specimen and high-dose heparin (100 U/mL). Additional information regarding diagnosis of HIT is available at arupconsult.com.

INTERPRETIVE INFORMATION: SRA, Unfractionated Heparin

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
