## Serotonin Release Assay (Heparin Dependent Platelet Antibody), Unfractionated Heparin

ARUP test code 2005631

SRA, Unfractionated Heparin, Low Dose 0 %

SRA, Unfractionated Heparin, High Dose 0 %

SRA, Unfractionated Heparin Negative (Ref Interval: Negative)

SRA, Unfractionated Heparin, Interp.

## See Note

This patient's specimen demonstrates a negative result in the serotonin release assay. A diagnosis of heparin-induced thrombocytopenia (HIT) is unlikely, but not completely excluded.

A positive result would demonstrate >= 20% serotonin release from reagent platelets in the presence of patient specimen and low-dose heparin (0.1 U/mL) and <20% serotonin release from reagent platelets (inhibition of the reaction) in the presence of patient specimen and high-dose heparin (100 U/mL). Additional information regarding diagnosis of HIT is available at arupconsult.com.
