

Patient: [REDACTED]  
DOB: [REDACTED] Age: 38 Sex: F  
Patient Identifiers [REDACTED]  
Visit Number (FIN): [REDACTED]

Client: [REDACTED]  
Physician: [REDACTED]

ARUP Test Code: 2005762  
Collection Date: 01/07/2022  
Received in lab: 01/11/2022  
Completion Date: 01/27/2022

## Interpretation

Test Performed: Chromosome Analysis  
Specimen Type: Placental Tissue (Villi)  
Indication for Testing: IUFD, AMA

Number of cells counted: 20  
Number of cells analyzed: 6  
Number of cells karyotyped: 6  
ISCN band level: 400  
Banding method: G-Banding

### RESULT

Normal Karyotype (Female)

46,XX

### INTERPRETATION

This analysis showed a normal result.

Analysis was performed on chorionic villus dissected from the specimen submitted. These results most likely reflect the fetal rather than the maternal karyotype, however due to the nature of the tissue submitted, the possibility of maternal cell contamination cannot be excluded.

Health care providers with questions may contact an ARUP genetic counselor at (800) 242-2787 ext. 2141.

The standard cytogenetic methodology used in this analysis may not detect small rearrangements or low-level mosaicism and cannot detect submicroscopic deletions or duplications that are detectable by genomic microarray analysis.

This specimen is being reflexed to genomic microarray

This result has been reviewed and approved by [REDACTED]

**NOTE:** Only the **Chromosome Analysis, Products of Conception** results are reported on this enhanced report. When the result of Chromosome Analysis is either "no growth" or "normal," **Genomic SNP Microarray, Products of Conception** is performed. If the genomic microarray is performed, those results can be accessed via a patient report or electronic medical records system after the genomic microarray has been completed.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
