Allergen, Food, Ovomucoid IgE
ARUP test code 2006434

Allergen, Food, Ovomucoid IgE

4.72 kU/L  H
(Ref Interval: <=0.34)

Allergen, Interpretation
ARUP test code 0055041

See Note
REFERENCE INTERVAL: Allergen, Interpretation

Less than 0.10 kU/L......Class 0.....No significant level detected
0.10-0.34 kU/L..........Class 0/1...Clinical relevance undetermined
0.35-0.70 kU/L.........Class 1.....Low
0.71-3.50 kU/L.........Class 2.....Moderate
3.51-17.50 kU/L.........Class 3.....High
17.51-50.00 kU/L.......Class 4.....Very High
50.01-100.00 kU/L......Class 5.....Very High
Greater than 100.00 kU/L..Class 6.....Very High

Allergen results of 0.10-0.34 kU/L are intended for specialist use as the clinical relevance is undetermined. Even though increasing ranges are reflective of increasing concentrations of allergen-specific IgE, these concentrations may not correlate with the degree of clinical response or skin testing results when challenged with a specific allergen. The correlation of allergy laboratory results with clinical history and in vivo reactivity to specific allergens is essential. A negative test may not rule out clinical allergy or even anaphylaxis.
