IDH1 R132H Point Mutation with Interpretation by Immunohistochemistry

ARUP test code 2007357

IDH1 R132H Point Mutation by IHC Result **Negative**

This result has been reviewed and approved by [REDACTED] M.D.
Controls stained appropriately.

TEST INFORMATION: IDH1 R132H Point Mutation by IHC

IDH1 R132H Point Mutation Detection by Immunohistochemistry detects the presence of mutant IDH1 R132H protein expression in brain tumors and can serve as a screening tool for molecular testing. A positive result indicates a probable IDH1 R132H mutation. A negative result indicates the tumor likely has no R132H mutation but the possibility of other IDH1 mutations, including less-common mutations occurring at R132 cannot be ruled out. The test is performed on paraffin-embedded, formalin-fixed tissue.

Controls were run and performed as expected.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
