**Pipecolic Acid, Serum or Plasma**

ARUP test code 2007406

Pipecolic Acid, Serum/Plasma **10.8 umol/L H (Ref Interval: <=5.2)**

**Pipecolic Acid Ser/Plas Interpretation**

See Note

In this sample the concentration of pipecolic acid was mildly elevated. Isolated increases in pipecolic acid can be seen in patients with peroxisomal disorders, although usually higher concentrations are observed in these conditions. Mild elevation of pipecolic acid can also be secondary to impaired hepatocellular function. Would repeat this study and evaluate urine pipecolic acid if clinically indicated. Clinical correlation is necessary for further interpretation of this result.
