Collection Date: 00/00/0000 00:00

Copper, Random Urine

ARUP test code 2011480

Creatinine, Urine - per volume 100 mg/dL

Copper, Urine - per volume <1.0 ug/dL (Ref Interval: <=3.2)
INTERPRETIVE INFORMATION: Copper, Urine

Individuals with symptomatic wilson disease usually excrete more than 100 ug copper per day. Other conditions associated with elevated urine copper include cholestatic liver disease, proteinuria, some medications, and contaminated specimens.

Although random specimens may contain diagnostic information, a 24-hour collection is a more consistent indicator of urine copper.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Copper, Urine - ratio to CRT Not Applicable ug/g CRT (Ref Interval: 10.0-45.0)

Unable to accurately calculate the creatinine normalized result due to a low per volume result.

H=High, L=Low, *=Abnormal, C=Critical
