

Client: Example Client ABC123
 123 Test Drive
 Salt Lake City, UT 84108
 UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 10/8/1985
Gender: Female
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Human Papillomavirus (HPV), High Risk with 16 and 18 Genotype by PCR, ThinPrep

ARUP test code 2011940

HPV Source	Cervical
HPV Genotype 16 by PCR	Positive *
HPV Genotype 18 by PCR	Positive *
HPV, Other High Risk by PCR	Positive *

INTERPRETIVE INFORMATION: Human Papillomavirus (HPV), High Risk with 16 and 18 Genotype by PCR

This test amplifies DNA of HPV16, HPV18 and 12 other high-risk HPV types (31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 66, and 68) associated with cervical cancer and its precursor lesions. Sensitivity may be affected by specimen collection methods, stage of infection, and the presence of interfering substances. Results should be interpreted in conjunction with other available laboratory and clinical data. A negative high-risk HPV result does not exclude the presence of other high-risk HPV types, the possibility of future cytologic abnormalities, underlying CIN2-3, or cancer.

This test is intended for medical purposes only and is not valid for the evaluation of suspected sexual abuse or for other forensic purposes. HPV testing should not be used for screening or management of atypical squamous cells of undetermined significance (ASCUS) in women under age 21.

VERIFIED/REPORTED DATES				
Procedure	Accession	Collected	Received	Verified/Reported
HPV Source	17-052-110235	2/21/2017 12:58:00 PM	2/21/2017 1:04:59 PM	2/21/2017 1:35:26 PM
