**Propoxyphene, Urine Screen with Reflex to Quantitation**

ARUP test code 20122629

Propoxyphene, Urn, Screen PresumptivePOS ng/mL (Ref Interval: Cutoff 300)

Screen, Urine Interpretation

See Note

**INTERPRETIVE INFORMATION:**

The absence of expected drug(s) and/or drug metabolite(s) may indicate non-compliance, inappropriate timing of specimen collection relative to drug administration, poor drug absorption, diluted/adulterated urine, or limitations of testing. The concentration at which the screening test can detect a drug or metabolite varies. Specimens for which drugs or drug classes are detected by the screen are reflexed to a second, more specific technology (GC/MS and/or LC-MS/MS). The concentration value must be greater than or equal to the cutoff to be reported as positive. Interpretive questions should be directed to the laboratory.
