Propoxyphene, Urine Screen with Reflex to Quantitation

ARUP test code 2012269

Propoxyphene, Urn, Screen	Positive ng/mL	(Ref Interval: Cutoff 300)
Screen, Urine Interpretation	<p>See Note</p> <p>INTERPRETIVE INFORMATION:</p> <p>The absence of expected drug(s) and/or drug metabolite(s) may indicate non-compliance, inappropriate timing of specimen collection relative to drug administration, poor drug absorption, diluted/adulterated urine, or limitations of testing. The concentration at which the screening test can detect a drug or metabolite varies. Specimens for which drugs or drug classes are detected by the screen are reflexed to a second, more specific technology (GC/MS and/or LC-MS/MS). The concentration value must be greater than or equal to the cutoff to be reported as positive. Interpretive questions should be directed to the laboratory.</p> <p>For medical purposes only; not valid for forensic use.</p> <p>Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS</p>
